Phoenix 27-XL Water Dispersible Pipe Joint Lubricant

Product Data Sheet

Description:

Phoenix 27-XL is a water dispersible, high performance pipe joint lubricant which has been certified by NSF for use in potable water supply systems, meeting NSF/ANSI Standard 61. Its creamy consistency allows the installer to apply a smooth, even coating of Phoenix 27-XL Water Dispersible Pipe Joint Lubricant to both the gasket and the pipe. Combine this with Phoenix 27-XL's excellent lubricity and the result is easier, faster and more reliable pipe assembly operations.

Formulated to be exceptionally versatile, Phoenix 27-XL Water Dispersible Pipe Joint Lubricant has a very broad usable temperature range: -10°F to 150°F. Since it applies equally well to wet or dry surfaces, Phoenix 27-XL can be used in all conditions, all year long, on any type of pipe.

Features:

- Certified to NSF/ANSI Standard 61
- Smooth, easy-to-spread
- All-season, all-weather lubricant
- Water dispersible
- Biodegradable
- Made from renewable resources
- FBC™ system compatible
- Minimizes insertion forces
- Does not support bacteria
- Contains no petroleum
- Contains no phosphates
- Non-toxic
- Certified low lead level (<0.25%)
- Low VOC

Product Data:

- Form: Soft, viscous paste
- Color: Off white
- Odor: Bland
- Boiling Point: >180°F
- Flash Point: >220°F
- Water Miscibility: Very good
- Bulk Density: Approximately 9.3 pounds per gallon
- pH Approx. 9.0
