# **#8 Industrial Rubber Lubricant**

---

## **Product Data Sheet**

---

### **Description:**

#8 Industrial Rubber Lubricant is a stable blend of vegetable oil, and blended soaps.

### **Uses:**

#8 Industrial Rubber Lubricant can be used in any application where rubber needs to be lubricated relative to its dry state. It provides low friction to prevent twisting and cracking. Will not cause softening or swelling of most rubber materials.

# 8 Industrial Rubber Lubricant can also be used in applications when wood needs to be lubricated. This product can provide lower friction on devices to smooth many operations. It can also be used to prevent varnish build up on wood cutting tools. #8 Industrial Rubber Lubricant can easily be removed with a water wash down. The biodegradable formula makes it safe and suitable for many applications. When dried it will not stain most wood products. (It is recommended testing a small inconspicuous spot for testing prior to use.)

### **Features:**

- Stable liquid
- Ready to use
- Contains no amines
- Contains no petroleum
- Contains no phosphates

### **Product Data:**

- Form: Liquid
- Color: Amber
- Odor: Bland
- Flash Point: >220°F
- Bulk Density: Approximately 8.4 pounds per gallon
- pH: 10.5 – 11.5
